

SyS Creations

We only practice in the healthcare industry.
Thus, we gained ultimate expertise.

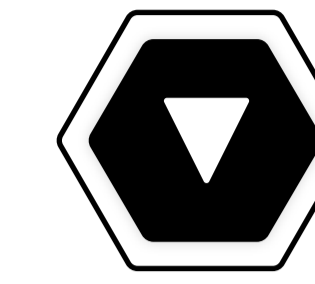

We accommodate compliance experts to develop a
HIPAA/PHIPA compliant app.

We have an in-depth understanding of the Canadian
market and users as we are headquartered in
Burlington, Ontario.

We don't only develop and deliver the app but guide
you to leverage the app and increase the sales.

We've mastered HL7 & RESTful API Integrations with
EHR providers across North America.

VS

Others

Others are Jack of all trades, but master of none.

They struggle with privacy laws and thus, give
cold shoulder to HIPAA/PHIPA regulations.

Non-Canadian companies fail to understand the
Canadian market and users' needs.

Their job ends with app delivery.

Others cannot easily achieve interoperability
due to the lack of prior experience.
